Daily Scholar Papers Report — 2026-07-26

[Download PDF](#)

Window covered: 2026-07-25 → 2026-07-26 (Google Scholar alerts + user-curated self-emails, last 24 h)

Executive Summary

No new candidates arrived in today's 24-hour window. Both intake channels — Google Scholar alerts and the user-curated self-email queue — returned zero threads at run time. This is a quiet-day report: no papers were screened at Stage-1 and none were deep-read. The next scheduled run will pick up whatever accumulates in the next 24 hours; carry-over from earlier days is not folded in, per the pipeline's rolling-window policy.

Outstanding: 0 · **Keep:** 0 · **Borderline High-Priority:** 0

Highlighted Papers

No papers to list for this window.

Cross-Paper Synthesis

Not applicable — empty window.

Writing & Rationale Insights

Not applicable — empty window. The pipeline itself ran cleanly: preference posteriors were refreshed (19 attributes on file), the repo was already in sync, and both intake queries executed against the Gmail connector without error.
